DETAILED ACTION

Status of the Application

1. This non-final office action is in response to the applicants' after final amendment received by the Office on 25 January 2011. The finality of previous Office action has been withdrawn.
2. Claims 1-79 have been presented in the application, of which, claims 20-79 are cancelled, claim 1 is currently amended, claims 2, 4, 6, 8, 10-11 and 13 were previously presented and claims 3, 5, 7, 9, 12 and 14 are original. Accordingly, pending claims 1-19 are addressed herein.

Response to Arguments

3. In response to the applicants' arguments, the rejection of claims 1-19 as anticipated by Takenaka et al. (WO 2003/090981) has been withdrawn.
4. In response to the applicants' amendment, the rejection of claim 1 as failing to comply with the enablement requirement has been withdrawn.
5. The finality of the previous office action has been withdrawn. The amendments to the claims have been entered.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims

Art Unit: 3664

are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1-19 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-53 of U.S. Patent No. 7,379,789.

Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-53 of the '789 patent include all of the limitations (or equivalents) found in claims 1-19 of the present application.
